ThermoFlow® standalone steam shrink tunnels offer high quality shrink performance that only steam can provide with the convenience of an integrated, self contained steam generator. When supplied with water and electricity, ThermoFlow systems automatically generate high quality, low pressure steam and directly supply it to an integrated shrink tunnel.

ThermoFlow integrated steam tunnels eliminate the need for costly centralized steam generation systems. They offer tool-less container changeovers and the changeover process is simple, intuitive and repeatable.

Like every Axon shrink tunnel, ThermoFlow offers the flexibility to perform five important shrink applications:

- Tamper evident bands
- Partial body sleeves
- Full body sleeves

- Full body over the cap sleeves
- Multi-packs

This flexibility makes Axon shrink sleeve tunnels one of the best values in the industry.

FEATURES AND BENEFITS

- **Size range flexibility** - Container or multi-pack diameters up to 6” and heights up to 12”
- **Tool-less size changeovers** - Fast, simple container changeovers increase uptime and enhance productivity
- **Stainless steel construction** - Durable, easy to clean, easy to maintain
- **Clear lift-off front panel** - Makes access to all key system components easy and convenient
- **Temperature control** - Simple manual adjustments of steam exhaust quickly increase or decrease tunnel temperatures - no complicated electronics to worry about
- **Adjustable steam distribution** - Perforated steam bars are easily positioned to achieve optimum shrink results

*Dependent on product size and shape

**OPTIONS**

- **Steam capture** - Traps exhaust steam for ventilation outside of environment
- **Third steam zone** - Enhanced shrink performance
- **Spare parts kit** - Recommended start-up parts inventory
